

Amlodipine Power Meets Liquid Dosing

Katerzia is sweet-tasting liquid amlodipine that provides consistency with every dose, eliminates the need for compounding, and is reimbursable under insurance and Medicaid.*

*Eligibility restrictions and terms and conditions may apply.

Katerzia[®]
(amlodipine)
Oral Suspension
1 mg/mL

KATERZIA is a calcium channel blocker and may be used alone or in combination with other antihypertensive and antianginal agents for the treatment of:

- Hypertension in adults and children 6 years of age and older to lower blood pressure. Lowering blood pressure reduces the risk of fatal and nonfatal cardiovascular events, primarily strokes and myocardial infarctions.
- Coronary Artery Disease:
 - Chronic stable angina.
 - Vasospastic angina (Prinzmetal's or Variant Angina).
 - Angiographically documented Coronary Artery Disease in patients without heart failure or an ejection fraction < 40%.

Katerzia[®] Oral Suspension
(amlodipine) 1 mg/mL

Not Everyone Likes or Can Swallow Pills or Capsules

Don't let swallowing issues add to your child's hypertension challenges

- The age at which children can swallow tablets varies
- Children who take their medication as prescribed have better outcomes and lower costs of care
- Liquid formulation and kid-friendly taste can eliminate obstacles surrounding swallowing

Childhood Hypertension Is More Common Than You Think

1 In 30 school-aged kids will have high blood pressure

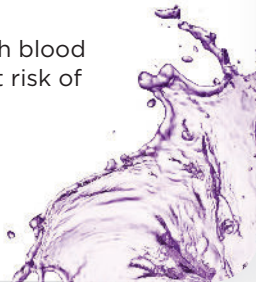

1.3 million teens and preteens in the United States are estimated to have high blood pressure

High blood pressure adds stress to a child's heart, kidney, and brain, and accelerates the aging of blood vessels

For every child with high blood pressure, 3 others are at risk of becoming hypertensive

Get to Know Your Hypertension Care Team

Pediatricians help manage your child's overall well-being

- Pediatricians focus on keeping healthy patients well
- Your child's pediatrician has the benefit of knowing your child over time
- Your child's pediatrician will address all aspects of your child's hypertension risk, such as weight, diet, and activity

A calibrated measuring device is recommended to measure and deliver the prescribed dose accurately. A household teaspoon or tablespoon is not an adequate measuring device. Ask your pharmacist or doctor for assistance in selecting a measuring device. **Shake well before using.**

ADDITIONAL IMPORTANT SAFETY INFORMATION

Do not use KATERZIA if you are allergic to amlodipine.

Please see additional Important Safety Information throughout and accompanying full Prescribing Information for Katerzia.

Katerzia[®] Oral Suspension
(amlodipine) 1 mg/mL

FDA-Approved Formulation Ensures Strength and Potency

Shake and pour Katerzia

- FDA approved, manufactured under cGMP guidelines
- Ensures consistent strength, taste, and potency from fill to fill, pharmacy to pharmacy
- No specialty pharmacy or compounding required
- Eliminates the variability of pill crushing and sprinkling

cGMP=Current Good Manufacturing Practices;
FDA=US Food and Drug Administration.

Why Katerzia? Amlodipine strength in a prescription liquid formulation

Katerzia (amlodipine suspension)

- Reliable consistency with every dose
- Amlodipine has been shown to significantly lower systolic blood pressure in children and teens aged 6 to 17 years
- Once-daily administration is effective around the clock
- BHA free/ethanol free

BHA=butylated hydroxyanisole.

What is the most important information I should know about KATERZIA?

KATERZIA may cause serious side effects, including:

- **Low blood pressure:** Symptoms of low blood pressure (hypotension) are possible, particularly in patients with serious heart valve disease (severe aortic stenosis). However, acute low blood pressure is unlikely.
- **Increased chest pain or heart attack:** Worsening chest pain called angina, and heart attack (acute myocardial infarction) can develop after starting or increasing the dose of Katerzia, particularly in patients with severe obstructive coronary artery disease.
- **Patients with severe liver disease:** Patients with severe liver disease may need to start with a lower initial dose of Katerzia.

Please see additional Important Safety Information throughout and accompanying full Prescribing Information for Katerzia.

IMPORTANT SAFETY INFORMATION

KATERZIA® (amlodipine) Oral Suspension, 1 mg/mL

INDICATIONS

KATERZIA is a calcium channel blocker and may be used alone or in combination with other antihypertensive and antianginal agents for the treatment of:

- Hypertension in adults and children 6 years of age and older to lower blood pressure. Lowering blood pressure reduces the risk of fatal and nonfatal cardiovascular events, primarily strokes and myocardial infarctions.
- Coronary Artery Disease:
 - Chronic stable angina.
 - Vasospastic angina (Prinzmetal's or Variant Angina).
 - Angiographically documented Coronary Artery Disease in patients without heart failure or an ejection fraction < 40%.

*A calibrated measuring device is recommended to measure and deliver the prescribed dose accurately. A household teaspoon or tablespoon is not an adequate measuring device. Ask your pharmacist or doctor for assistance in selecting a measuring device. **Shake well before using.***

ADDITIONAL IMPORTANT SAFETY INFORMATION

Do not use KATERZIA if you are allergic to amlodipine.

What is the most important information I should know about KATERZIA?

KATERZIA may cause serious side effects, including:

- **Low blood pressure:** Symptoms of low blood pressure (hypotension) are possible, particularly in patients with serious heart valve disease (severe aortic stenosis). However, acute low blood pressure is unlikely.
- **Increased chest pain or heart attack:** Worsening chest pain called angina, and heart attack (acute myocardial infarction) can develop after starting or increasing the dose of Katerzia, particularly in patients with severe obstructive coronary artery disease.
- **Patients with severe liver disease:** Patients with severe liver disease may need to start with a lower initial dose of Katerzia.

Before taking KATERZIA, tell your healthcare provider about all your medical conditions, including if you:

- ever had heart disease
- ever had liver problems

- are pregnant or plan to become pregnant. Your doctor will decide if KATERZIA is the best treatment for you.
- are breastfeeding. Do not breastfeed while taking KATERZIA. You can stop breastfeeding or take a different medicine.

Tell your healthcare provider about all your medicines, including prescription and over-the-counter medicines, vitamins, and herbal supplements.

Tell your doctor if you are taking simvastatin, cyclosporine, or tacrolimus. Your doctor may need to change the doses of your medications or monitor you carefully for side effects.

The most common side effect of KATERZIA is swelling (edema), which occurs in a dose-related manner. Other adverse experiences not dose-related but reported with an incidence >1.0 % are tiredness, nausea, abdominal pain, and sleepiness.

Store KATERZIA at refrigerated temperature (2°C to 8°C/36°F to 46°F). Avoid freezing and excessive heat. Protect from light.

The Important Safety Information does not include all the information needed to use KATERZIA safely and effectively. Please talk to your healthcare provider and see the complete Prescribing Information for KATERZIA.
